

Seeking CAD Technician/Drafting

www.bdaarc.com

BDA Architecture – *Building Design for Animals*, an award-winning design firm specializing in animal care facilities, is seeking a self-motivated individual with good communication skills and experience in the production of Architectural commercial building schematic and construction documents.

Minimum education requirements are an Associate's degree in Architectural Technology or equivalent. CSI Certified Document Technician credentials (CDT) a plus.

The candidate we seek will have a minimum of 5 years professional CAD experience; AutoCAD proficiency (AutoCAD Architecture 2013). A strong sense of graphic presentation and experience with computer graphics programs and SketchUp are a plus.

Primary responsibilities include developing architectural construction documents, assure conformity to standard commercial construction practices, technical standards, code requirements, procedures and schedules. As a project team member you will develop solutions to building design problems.

Non-architectural experience (mechanical, civil, process or plant design) will not be considered for this position.

To apply please email cover letter and resume to BDA_HR@bdaarc.com.
