

Greetings –

I have a remodel requiring vision and excitement for a cool project.

This is a large group home that I want to convert into a single family residence.

We will need to remove a load bearing wall plus create a kitchen and entertainment area to make Martha Stewart proud. Also need to be creative at the roof as there are three huge refrigerated/heating combo units on the roof and want to create dormers, turrets or something to hide them while accentuating the roof and changing the overall style of the home. For instance from traditional to Spanish or Territorial style. Will be adding adobe courtyards and exterior rooms to further enhance the entertainment value.

If you feel you would be the right architect for this project, please contact Gene at 505-507-0902 (m) or email at gr8n8ive@yahoo.com Thank you.
